

Taking STAR/AGILE to the next level

Raghav Sriram
21/08/2014

Project Success is...

- ✓ High quality
- ✓ On-schedule
- ✓ Within budget
- ✓ Happy end users
- ✓ Lessons learned
- ✓ Realized benefits

Red Flags to Failure...

- 🚩 Wrong 1st project
- 🚩 Underfunded 1st project
- 🚩 Lack of experienced BPM professionals
- 🚩 Untrained staff
- 🚩 Weak internal resources
- 🚩 Weak internal stakeholder / champion

The different levels of STAR

STAR is Appian's methodology for project success.

STAR works at multiple levels:

- Program
- Project
- Scrum

STAR is recursive

Program

Project

Scrum

Program STAR

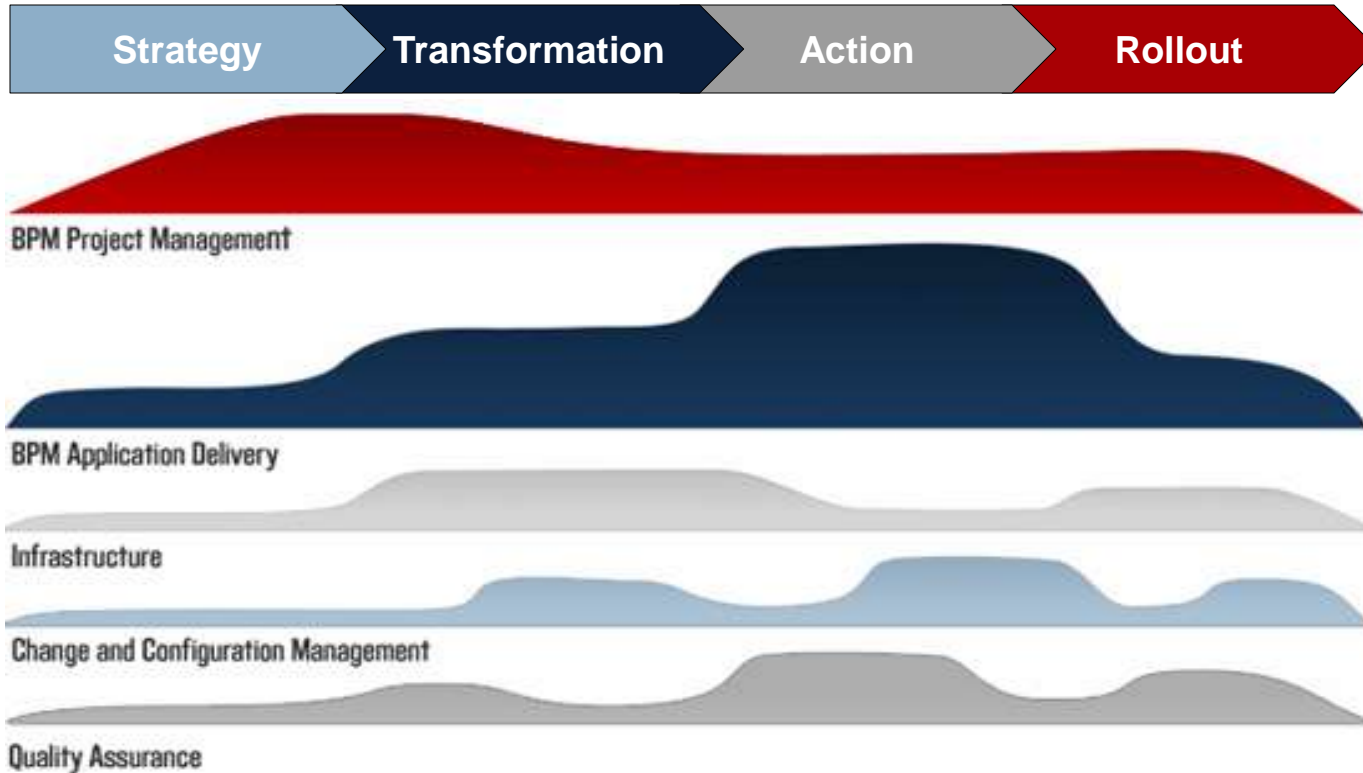

Program STAR defines the 4 major phases that need to occur at the program or enterprise level.

Program STAR

- S: Define the **strategy** for multiple project successes
- T: **Transform** the people and culture
- A: Realize the vision through **action**
- R: **Rollout** successful projects with assurance

STAR High-level

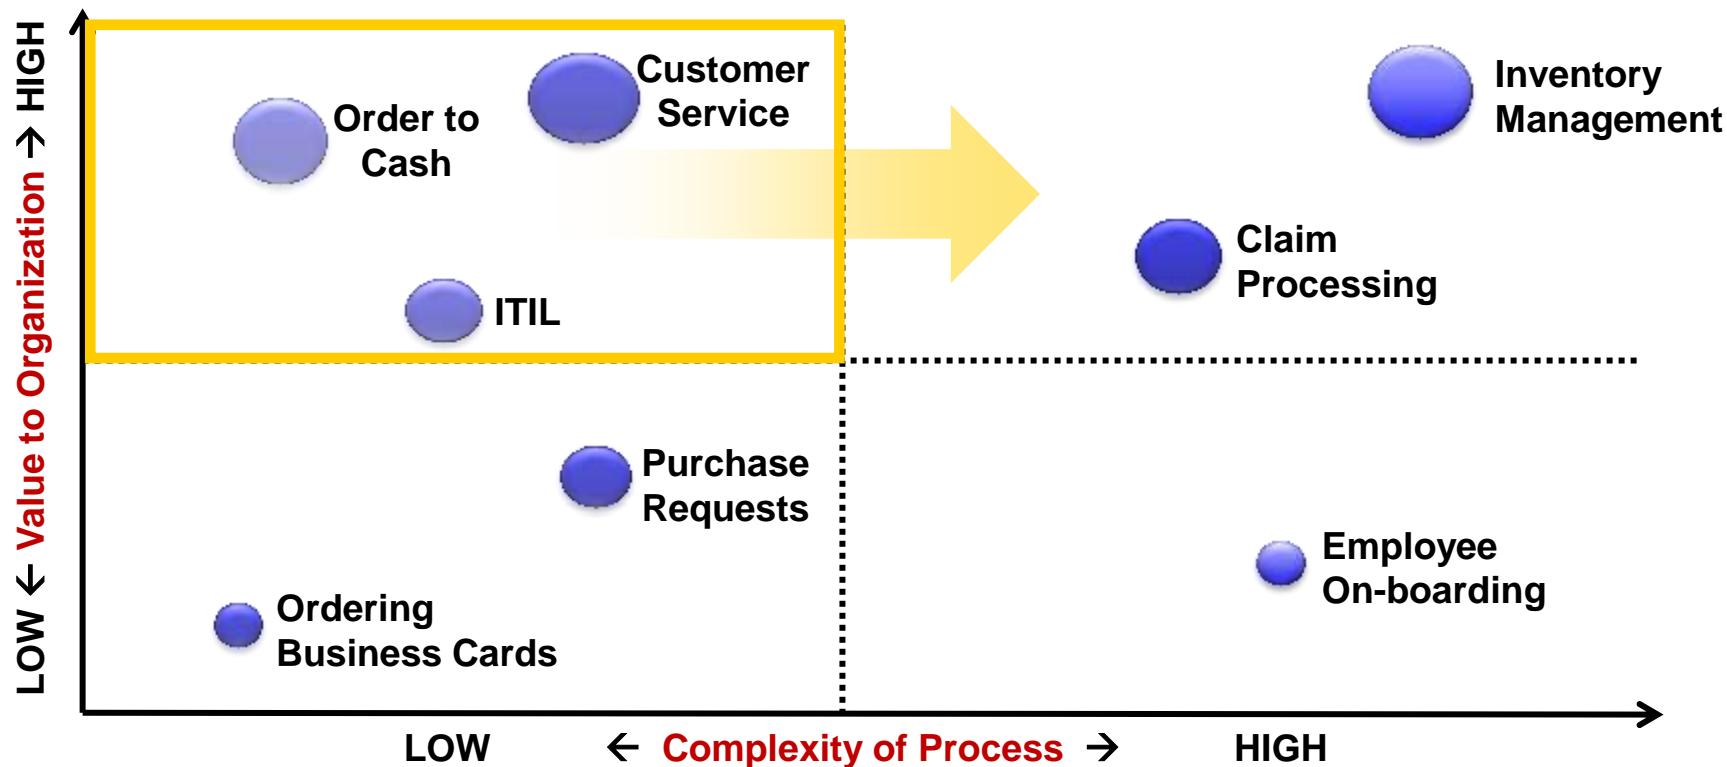

Program STAR

Step 1: Establish the Foundation for BPM Program Success

Prioritizing BPM Applications with Visual Mapping

Rating BPM Application Complexity

Measuring Complexity

Rating BPM Application Value

Measuring Value

Program STAR

Step 2. Add the Ingredients for BPM Program Success

The Right Execution Approach

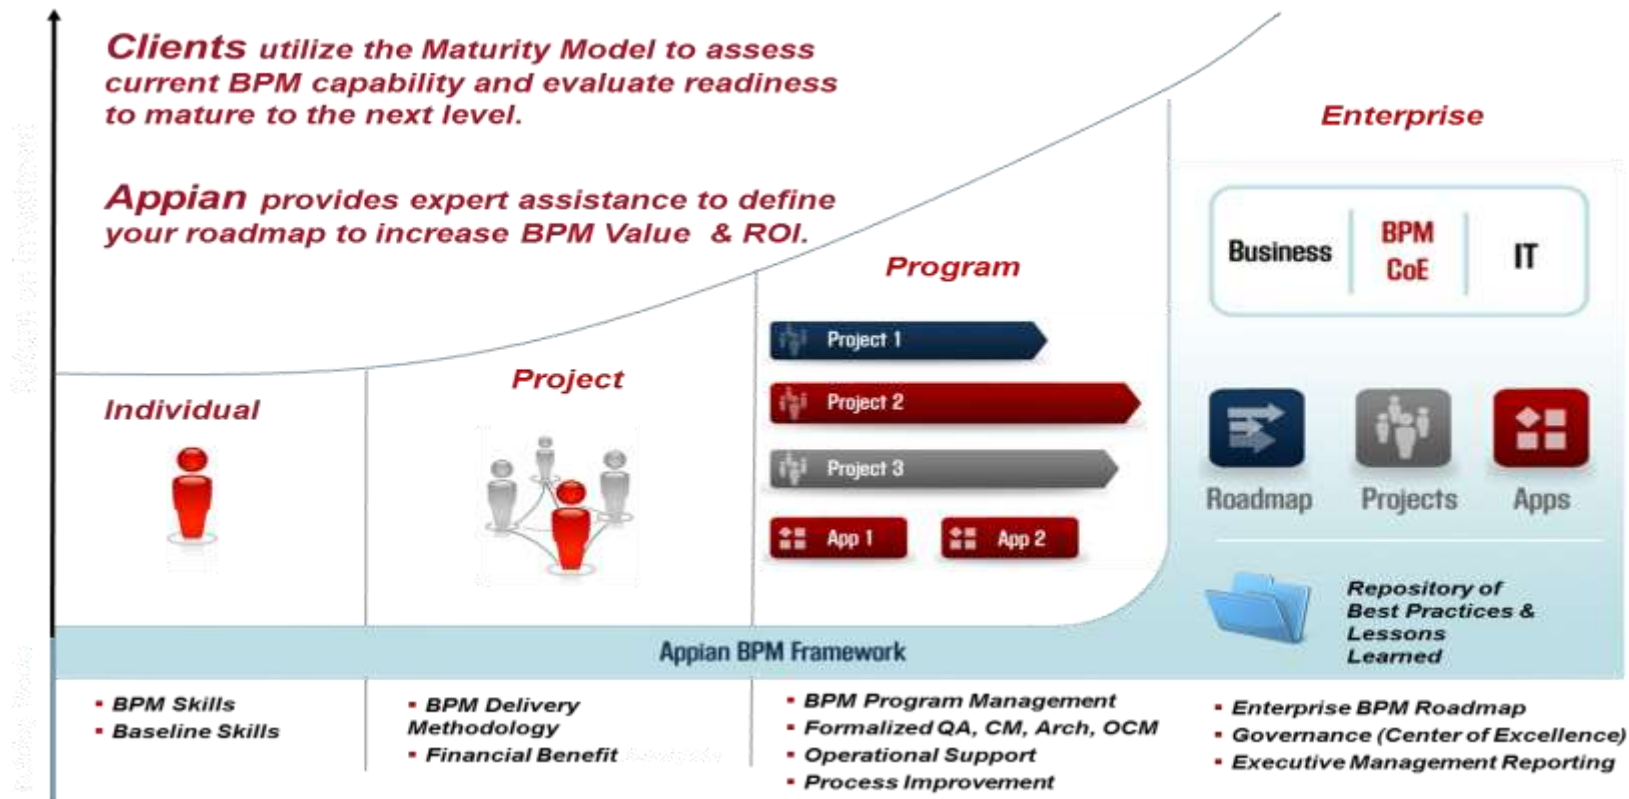

Benefits of BPM Enablement

- Enablement empowers people and organizations to execute excellently on the Appian platform
 - Reduce time-to-deployment
 - Increase application quality
 - Decrease project pandemonium
 - Speed up project on-boarding
 - Decrease total cost of ownership
 - More satisfied customers!

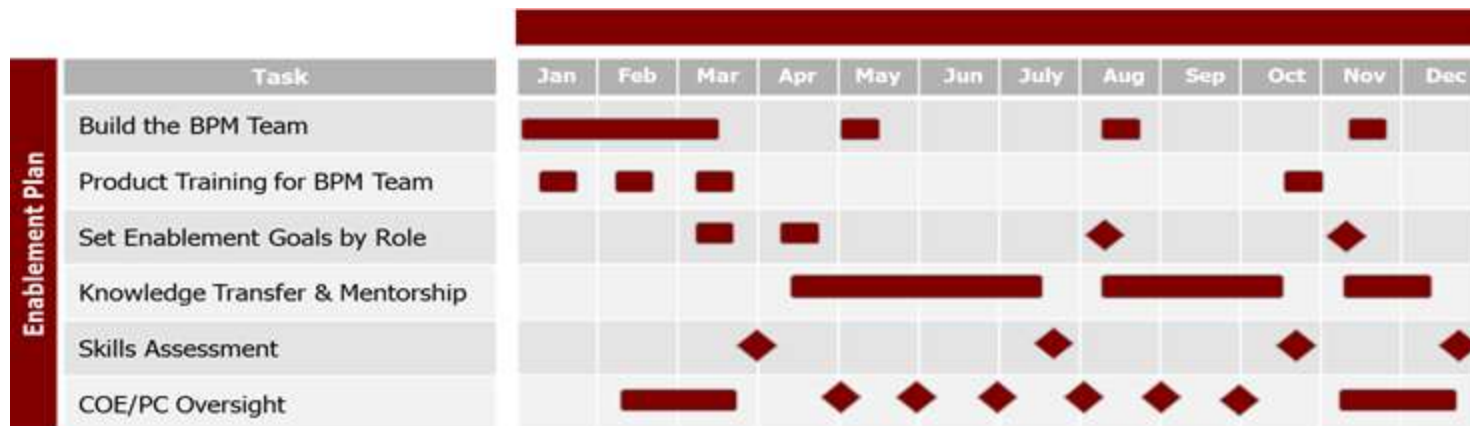

Enablement = Maturity Over Time

Typical Program Enablement Plan

- Enablement plan increase execution velocity and moves the organization further along the Maturity Model
- Enablement plan spans multiple projects, and the sample below assumes 3-4 projects

- This is separate from your standard project schedule

Program STAR

Step 3. Deliver with the Best Methodology for Success

Program STAR

Step 3. Deliver with the Best Methodology for Success

Project STAR

The Action phase of Program STAR encompasses the entirety of Project STAR

Project STAR:

- S: Define the project strategy
- T: Transform ideas and requirements into plans
- A: Take action and deliver value
- R: Rollout and deploy new functionality

STAR: Define the project strategy

Strategy (1~2 weeks)

- Define preliminary scope
- Define contract management
- Prepare LOE estimate
- Prepare Project Charter
- Define architecture & design review requirements
- Prepare preliminary SCRUM plan

STAR: Transform the project through planning

Transform (2~4 weeks)

- Initiate staff pre-kickoff preparation
- Kickoff project
- Confirm management commitment
- Confirm design review schedule
- Finalize project plan and backlog
- Complete user stories
- Complete specifications
- Prepare Test plans

STAR: Take Action to deliver value

Execute (6~12 weeks)

- Prepare infrastructure & installation
- Iteratively deliver commitments for acceptance
- Test for quality assurance
- Deliver application to work plan
- Manage scope, cost & schedule
- Manage change, communication, training, roles and resources, etc.
- Monitor financials and contract performance
- Update project plan

Scrum STAR

The Action phase of Project STAR encompasses all of Scrum STAR

Scrum STAR:

- S: Sprint planning
- T: Transform requirements into designs
- A: Act, implement, and test
- R: Review and release

Scrum STAR

The Action phase of Project STAR encompasses all of Scrum STAR

Scrum STAR:

- S: Sprint planning
- T: Transform requirements into designs
- A: Act, implement, and test
- R: Review and release

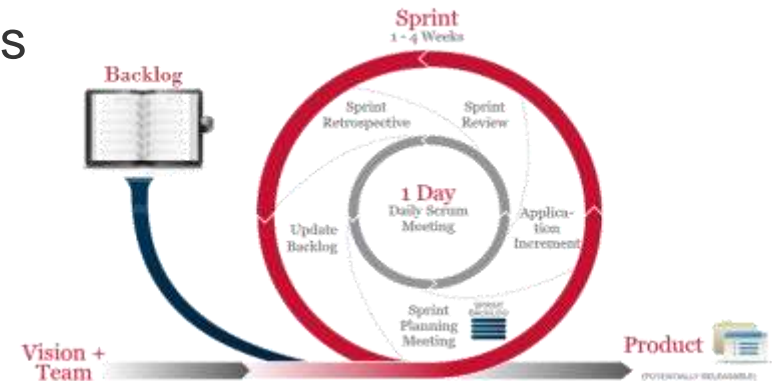

Scrum STAR

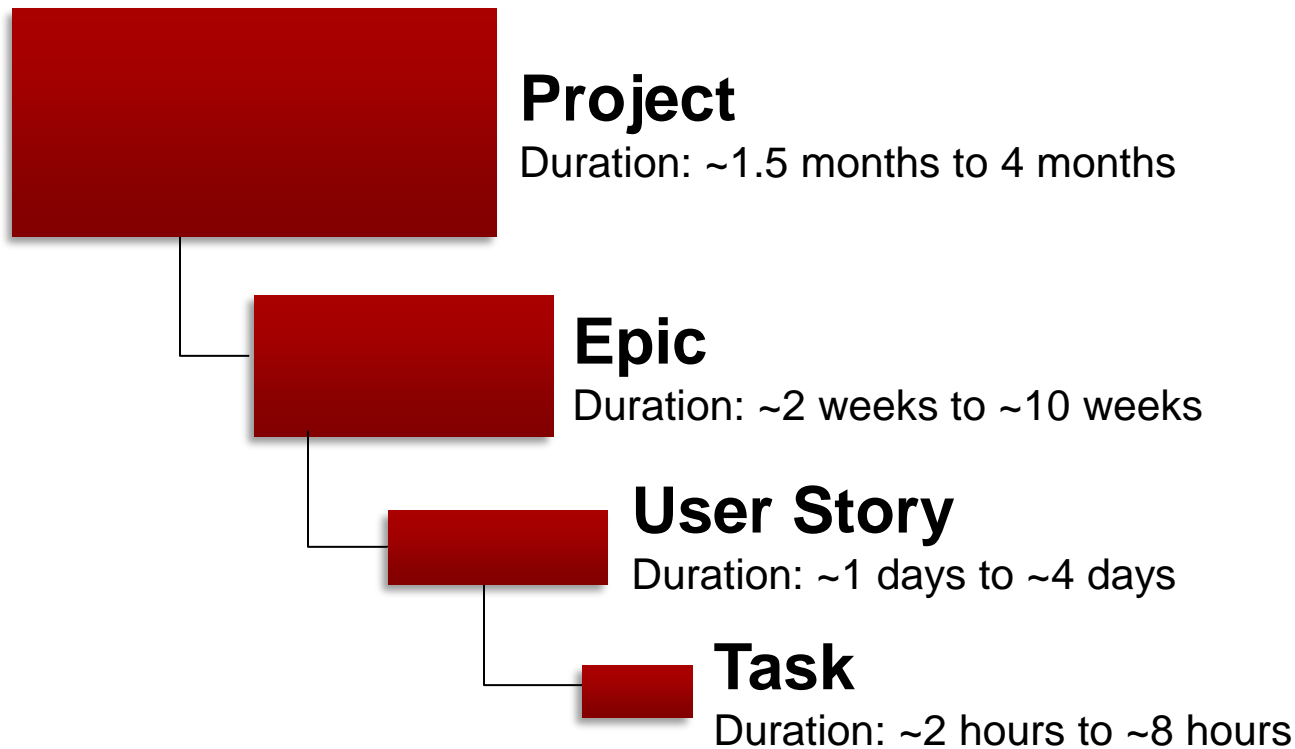

The Action phase of Project STAR encompasses all of Scrum STAR

Scrum STAR:

- S: Sprint planning
- T: Transform requirements into designs
- A: Act, implement, and test
- R: Review and release

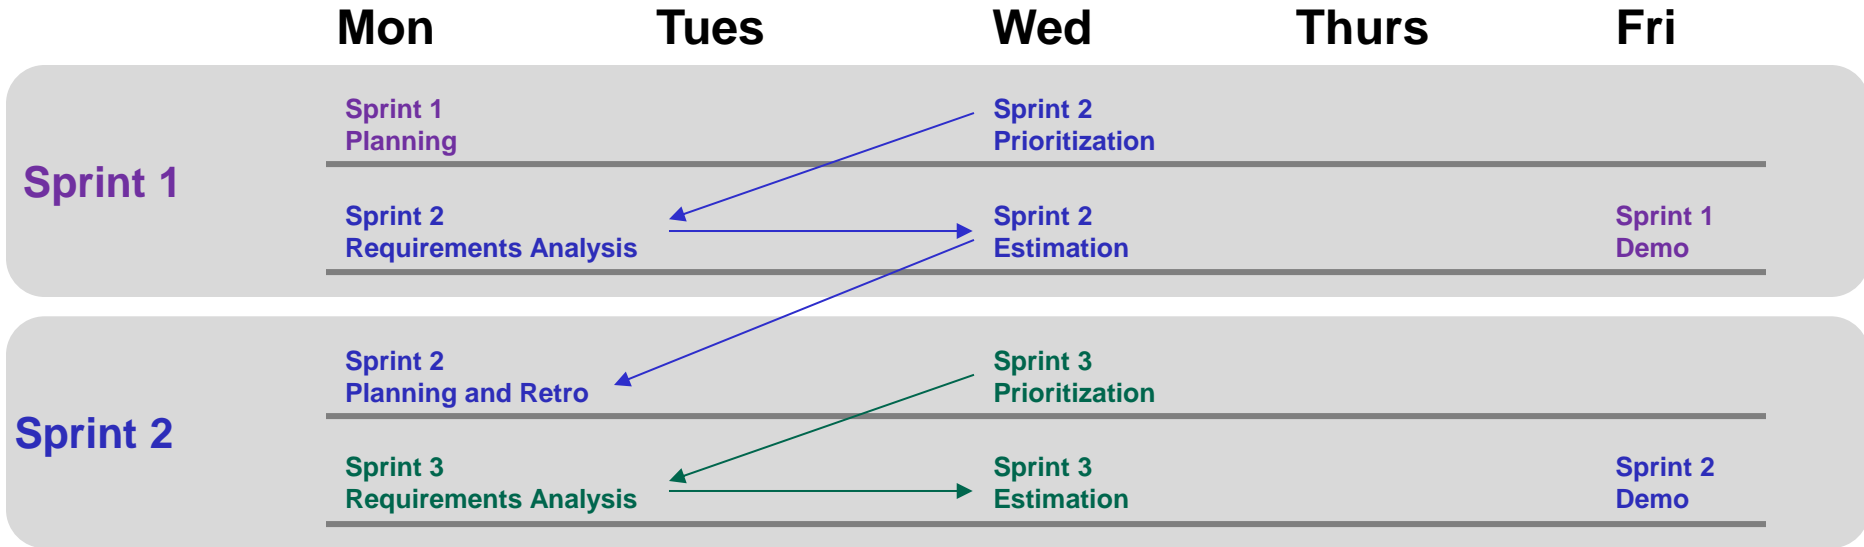

Agility comes from agile planning

Analyze requirements just in time

Each sprint includes planning for the next sprint

Project STAR

When the team has developed a sufficient amount of functionality, it's time for project-level rollout.

- Project STAR
- S: Define the project strategy
- T: Transform ideas into plans
- A: Take action and deliver value
- R: Rollout and deploy new functionality

Project STAR

When the team has developed a sufficient amount of functionality, it's time for project-level rollout.

Project STAR

S: Define the project strategy

T: Transform ideas into plans

A: Take action and deliver value

R: Rollout and deploy new functionality

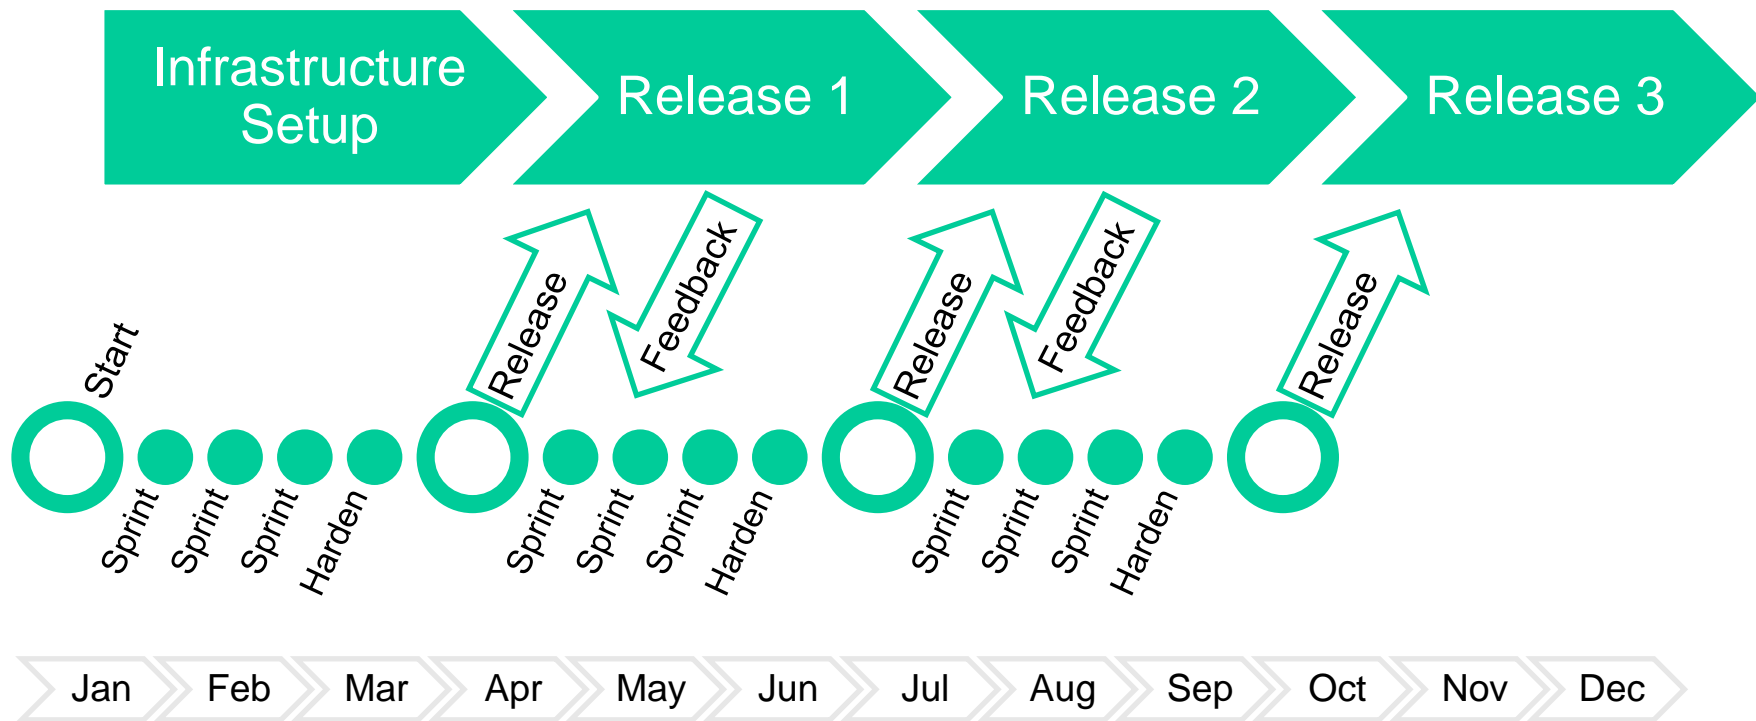

STAR: Rollout with assurance

Deploy & Monitor (1~2 weeks)

- Prepare application documentation
- Prepare application support plan
- Communicate knowledge of application to support team
- Deploy application to production
- Review enhancement backlog
- Monitor application performance
- Measure actual performance metrics against ROI goals

Release cadence provides confident forecasting

Program STARU

Step 4: Assure project rollout success, user adoption, and continuous performance

Program STARu

Step 4: Assure project rollout success, user adoption, and continuous performance

Summary

1. Establish the Foundation for BPM Program Success
2. Add the Ingredients for BPM Program Success
3. Deliver with the Best Methodology for Success
4. Assure project rollout success, user adoption, and continuous performance

Thank you
